Securing our cyber future

[Upskill Canada](#) and [Lighthouse Labs](#) have come together to address the growing demand for skilled talent in **cybersecurity and IT support** across Canada. The program's mission is to support small and medium-sized businesses (SMEs) by providing access to qualified talent trained in high-demand fields.

Ideal roles for graduates

Graduates of this program are best suited for impactful roles such as:

- Cybersecurity Analyst
- Incident Response Analyst
- Network Administrator/Technician
- IT Support Specialist (with a cybersecurity focus)
- Systems Administrator (with security responsibilities)
- Help Desk Technician (covering general IT and security needs)
- And many more!

Key benefits for your business

50% wage reimbursement

Receive a wage reimbursement that covers **50% of wages until March 31st 2025** lowering the cost of hiring while securing top talent.

Flexibility in roles

Whether you need a dedicated cybersecurity professional or a hybrid IT role that also handles security tasks, this program supports a variety of positions to suit your needs.

Access to skilled talent

Graduates complete 12 weeks of specialized training and 4 weeks of hands-on experience in Cybersecurity — ensuring they're ready to make an immediate impact.
